gtlogic

Centre Azar, 3rd Floor Antelias, Mtaileb

Dear Hiring Team,

I am writing to express my interest in The Many-Faced God aka Full-Stack Software Engineer position at gtlogic, as advertised on your website. As a senior Computer Science student at the Lebanese American University, graduating in May 2024, I have developed solid experience in web development, I am excited about the opportunity to contribute to your dynamic team.

In my previous role as a web development intern at Beesline, I gained valuable experience working with ReactJS as a front-end framework where I developed a website for the e-commerce department to visualize the sales data. During the same time, I was also a back-end developer intern at Integrated Digital Systems where I developed the backend functionalities for a booking system using .NET C#. Moreover, in my own capstone project where I am developing a website to help students at LAU make friends based on certain metrics, I am using HTML, CSS, JavaScript, and Bootstrap for front-end development, and Laravel framework for the back-end development which makes me a good fit for this position where I have worked with these technologies and did not just dabble in them a bit.

Throughout my academic and professional journey, I have continuously improved my programming skills by taking on new projects and constantly trying to learn different languages, particularly through coursework in university and my internships.

I am particularly drawn to gtlogic's commitment to creating robust and amazing products, and I am eager to contribute my technical skills to the software engineering team and learn more from this experience. I am confident that my development skills, familiarity with the technologies needed, problem-solving abilities, attention to detail, and adaptability make me a strong fit for this position.

Thank you for considering my application. I am looking forward to further discuss how my background, skills, and enthusiasm for software development can contribute to the success of gitlogic. I am available for an interview at your earliest convenience and can be reached at +961 03 090 427 or via email at janaalbardan04@gmail.com  or jana.albardan@lau.edu.

Thank you for your time and consideration.

Best Regards,

Jana Al Bardan
